

Eco challenge 4 : learn more about fibres

A small group has decided to work on fibres

1 try and recognize them

What is hemp and how is it useful ?

We learnt that its leaves, flowers, fibers and seeds are useful ingredients for further processing in the food and cosmetic industries. Hemp can be used to make oil, paper, plastic, clothing, milk, protein-rich flour or tea, and can even be found in lip balm, bath bombs and liquid soap.

2 try and use hemp to create bracelets

to create bracelets , once again creativity was the key !
